

CHARLES LUQUET, AIA

MANNING, APC

Mr. Luquet has vast experience in providing all aspects of professional architectural services, project management and effective Quality Control experience. His unique QC experience in the field working for a large design-build firm has well complemented his knowledge of design and construction documents production. His eye for constructability and QA/QC procedures at every phase is important for all projects, especially those with expedited schedules and unique technical challenges. As part of the document production team and as an owner representative, he has reviewed many projects and assisted outside consultant architects to improve the technical accuracy of project documents and the cost-effectiveness of projects.
